

Ale Algra did physics at Utrecht University (BSc 1975) and continued with medicine at Erasmus University Rotterdam (MD 1981). He trained in epidemiology at Harvard (Msc 1985) and did his PhD on risk factors from 24-hour ECG for sudden death at Erasmus Medical Center, Rotterdam (1990). Since then he works at UMC Utrecht. In 2005 he became professor of clinical epidemiology spending most time on cerebrovascular disease.
