

Dr. Chou is an Associate Professor in the Departments of Critical Care Medicine, Neurology, and Neurosurgery at the University of Pittsburgh School of Medicine. Dr. Chou completed medical school at McGill University (Montreal, Canada), residency and fellowship trainings at the Massachusetts General Hospital/Brigham and Women's Hospital/Harvard Medical School (Boston, MA), and Masters degree in translational research at Harvard Medical School (Boston, MA). She is a board-certified neurologist with subspecialty training and board certifications in Neurocritical Care and Vascular Neurology. Dr. Chou's clinical practice focuses on critically-ill patients with injuries to their nervous systems. Her research focuses on the use of human molecular biomarkers to probe mechanisms and predict outcome following acute vascular brain injury conditions such as subarachnoid hemorrhage. Dr. Chou also participates as co-investigator in multicenter clinical trials in acute brain injuries including ischemic stroke, intracerebral hemorrhage, SAH, and traumatic brain injury. Dr. Chou has published over 50 manuscripts in addition to reviews and book chapters, and has received numerous honors for her research and scholarly work.
